Brooklyn, NY | mtaylor3@haverford.edu | [linkedin.com/in/mateo-taylor/](https://www.linkedin.com/in/mateo-taylor/) | github.com/MateoTaylor

EDUCATION:

Haverford College <i>B.A. in Computer Science & Sociology, Minor in Statistics GPA: 3.9</i>	Haverford, PA <i>Sep. 2023 - May 2027</i>
University of Pennsylvania <i>4+1 M.S. in Computer Information Science GPA: 4.0</i>	Philadelphia, PA <i>Sep. 2025 - May 2028</i>

WORK EXPERIENCE:

Statistical Sociology Research Assistant <i>Haverford College</i>	Haverford, PA <i>Sep. 2025 - Present</i>
- Collaborated with Prof. Matt McKeever to investigate child support patterns in single-father households, preparing datasets for submission to the 2026 ASA Conference. - Processed 22 years of CPS economic data in Python, cross-referencing IPUMS and Census Bureau records.	
Software Engineering Intern <i>Roundhouse One</i>	San Francisco, CA <i>Jun. 2025 - Aug. 2025</i>
- Automated data ingestion and hardware deployments for a team of 20+ technicians and clients. - Integrated iOS mobile app into AWS serverless infrastructure (API Gateway, Lambda, Redshift, S3), enabling secure data syncing and reducing deployment validation errors by 40%.	
Computer Science Teaching Assistant <i>Haverford College</i>	Haverford, PA <i>Sep. 2024 - Present</i>
- Selected to TA Data Science and Intro to Programming, mentoring 50+ students in Python and machine learning. - Facilitated weekly lab sessions, held office hours, and graded assignments for 8 hours per week	
Research Intern <i>Aflac US</i>	Manhattan, NY <i>Jul. 2024 - Aug. 2024</i>
- As team captain, led a team of 10 interns in researching quarterly financial documentation between 2022-2024. - Presented analysis on the impact of COVID-19 on Aflac US & Japan's fixed maturity securities portfolios.	

RELEVANT PROJECTS:

Brooklyn Housing Development Analysis	<i>Feb. 2025 - May 2025</i>
- Cleaned, merged, and visualized 65,000+ construction projects using R, GeoPandas, and ArcGIS. - Conducted statistical analysis on 10 year housing growth, highlighting development trends east of Prospect Park.	
Rust Reinforcement Learning	<i>Sep. 2025 - Jan. 2026</i>
- Designed an RL-vision agent that navigates a real time 3D game environment and gathers resources. - Trained machine learning model from scratch using 500+ hours of video game footage, using a combination of imitation and reinforcement learning in a custom C# training environment.	

COMPETITIONS & AWARDS:

NexHacks 2026: 1st of 282 teams in Healthcare track	Carnegie Mellon University
HopHacks 2025: 2nd of 102 teams Overall & 2nd Place in Healthcare track	Johns Hopkins University
PennApps 2025: 1st of 85 teams in Bloomberg Sustainability track	University of Pennsylvania

SKILLS:

Programming: Python, C/C++, R, SQL, Dart, Java

Dev Tools: Git, Linux, Tableau, PyTorch, Pandas, Flutter, AWS Cloud, Cloudflare, Microsoft Office, FastAPI, Django

Extracurriculars: Havercode Board Member, Hackathon Coordinator, Quantum Computing Club, Cycling Club
