

Mateo Taylor

Brooklyn, NY | mtaylor4@engineering.upenn.edu | [LinkedIn](#) | [Github](#) | [Personal Website](#)

EDUCATION:

University of Pennsylvania

4+1 M.S. in Computer Information Science | GPA: 4.0

Philadelphia, PA

Sep. 2025 - May 2028

Haverford College

B.A. in Computer Science & Sociology, Minor in Statistics | GPA: 3.9

Haverford, PA

Sep. 2023 - May 2027

WORK EXPERIENCE:

DevOps Intern

NBCUniversal

Stamford, CT

Jun. 2026 - Aug. 2026

- Developed custom EC2 lookup tools that accelerated diagnostic times and fortified infrastructure stability for a 15-engineer distribution team throughout high-stakes World Cup 2026 operations.
- Monitored GitHub and ArgoCD continuous delivery (CD) pipelines and engineered automated diffing tools, proactively mitigating broadcast risks for 150+ concurrent streaming channels.

Data Engineering Intern

Roundhouse One

San Francisco, CA

Jun. 2025 - Aug. 2025

- Automated data ingestion and hardware deployments for a team of 20+ on-site technicians and clients.
- Integrated iOS mobile app into AWS serverless infrastructure (API Gateway, Lambda, Redshift, S3), enabling secure data syncing and reducing deployment validation errors by 40%.

Data Science TA & Statistical Research Assistant

Haverford College

Haverford, PA

Sep. 2024 - Present

- Investigated financial patterns in single-father households, preparing a dataset across 22 years and 3 million entries of CPS economic data in Python, with features cross-validated between IPUMS and Census Bureau records.
- Teaching assistant for Robotics, Data Science, and Introductory Programming courses. Responsible for facilitating weekly lab sessions, holding office hours, and grading lab assignments.

RELEVANT PROJECTS:

Rust Reinforcement Learning

Sep. 2025 - Jun.. 2026

- Designed an RL-vision agent that navigates a real time 3D game environment and gathers resources.
- Trained machine learning model from scratch using 500+ hours of video game footage, using a combination of imitation and on-policy reinforcement learning in a custom C# training environment.

Brooklyn Housing Development Analysis

Feb. 2025 - May 2025

- Cleaned, merged, and visualized 65,000+ construction projects using R, GeoPandas, and ArcGIS.
- Conducted statistical analysis on 10 year housing growth, highlighting development trends east of Prospect Park.

COMPETITIONS:

NexHacks 2026: 1st of 282 teams in Healthcare track

Carnegie Mellon University

- Developed SmartPT, utilizing custom hardware and 3D pose estimation to track physical therapy mobility.

HopHacks 2025: 2nd of 102 teams Overall & 2nd Place in Healthcare track

Johns Hopkins University

- Built MedRelay, a multi-agent NLP pipeline mapping clinical dialogue directly to insurance forms.

PennApps 2025: 1st of 85 teams in Bloomberg Sustainability track

University of Pennsylvania

- Built CarbonChain, an EVM blockchain platform utilizing smart contracts for transparent sustainability funding.

SKILLS:

Programming: Python, R, C/C++, SQL, Dart, Java, Git, Linux, Docker

Tools: PyTorch, Pandas, AWS Cloud, Cloudflare, Microsoft Office, CI/CD, Tableau, AI Agents, NLP, Copilot

Extracurriculars: Havercode Board Member, Hackathon Coordinator, Quantum Computing Club, Poker Club
